Where Safety Meets Comfort

ThermoGard® dispersive electrodes provide safe grounding during electrosurgical procedures in both dual- and single-foil varieties that provide a range of benefits:

Skin Safety. The blue hydro-gel creates quality contact with patient skin throughout procedures, while remaining gentle.

Argon-Optimized. Our ThermoGard Plus ABC® dispersive electrodes were designed for use with ConMed Argon Beam Coagulation (ABC).

Multiple Configurations. Versatile to meet your needs, these dispersive electrodes are available in pediatric and adult sizes, as well as dual and single foil
