ORTHOPANTOMOGRAPH™ OP30

Design and quality

INSTRUMENTARIUM
You can’t duplicate the legacy.

1946  Professor Y.V. Paatero publishes his first paper on Panoramic Tomography.
1951  "Pantomography" equipment is presented.
1961  The first dental panoramic X-ray, ORTHOPANTOMOGRAPH™ OP1, is developed.
1964  Commercialization of the ORTHOPANTOMOGRAPH™ units begins with models OP2 and OP3.
1978  ORTHOPANTOMOGRAPH™ system becomes the leading name within dental panoramic imaging
with models OP5/OC5, OP6 and OP10/OC10.
1992  New innovations, such as the lifting-cassette head and linear tomography, are introduced along
with the OP100 product family.
1999  Direct digital ORTHOPANTOMOGRAPH™ OP100 product family is introduced.
2006  New ORTHOPANTOMOGRAPH™ product family OP200 is launched.
2007  Volumetric Tomography (VT) is developed to maximize the performance of an
ORTHOPANTOMOGRAPH™ unit.
2009  A new member to the ORTHOPANTOMOGRAPH™ product family — OP30 — is launched.
2011  CTCT era begins. ORTHOPANTOMOGRAPH™ OP300, the most comprehensive 3-in-1 platform is
launched to celebrate 50 years of ORTHOPANTOMOGRAPH™ success.
2013  Introduction of improved 3D image quality, new metal artifact reduction (WAR) tool and endo
mode for ORTHOPANTOMOGRAPH™ OP300 3D images.
2013  New revision of ORTHOPANTOMOGRAPH™ OP30 unit is launched.
2014  ORTHOPANTOMOGRAPH™ OP300 Maxillo configuration, offering diagnostic information of the
entire maxillofacial region, is launched.

A standard panoramic system does not mean standard design.

ORTHOPANTOMOGRAPH™ OP30 is a digital panoramic X-ray unit designed for every dental office demanding a top quality digital panoramic system. ORTHOPANTOMOGRAPH™ OP30 unit combines distinctive design and reliable quality with all essential tools for standard panoramic imaging needs. OP30 continues the legacy of the well-known ORTHOPANTOMOGRAPH™ product family.
One-of-a-kind image quality

Sharp and detailed images are enabled by powerful tubehead and wide range of exposure settings that fit every patient size. A special V-shaped radiation beam is essential to overcome anatomical differences between the patients.

User-friendly workflow

Just 2 selections need to be made from the control panel:
- Choose the imaging program
- Select patient size

Straightforward operation makes taking the panoramic image fast and easy. An integrated 5.7 inch touch screen with remarkably user-friendly navigation is extremely simple to use.

Patient positioning

Intuitive 5-point patient positioning system holds the patient still during the imaging procedure to reduce movement artifacts. Three laser positioning lights make positioning accurate. The sharp layer is easily adjustable for every patient.

All the essentials included

- Stable 5-point patient positioning
- Optimal imaging geometry
- Adjustable anterior layer position with 3 positioning lights
- Powerful high frequency tube head design
- High resolution CCD imaging sensor
- V-shaped collimation optimizes image quality
- Versatile software tools to enhance diagnostic capabilities

Benefits of V-shaped collimation

- More penetrating power
- Wider mandibular layer
- A V-shaped beam supports better imaging of the human anatomy than a standard beam and ensures a homogeneous image.
Imaging programs

Standard panoramic
The standard panoramic imaging program provides clear definition of the dental anatomy including TMJ’s – only in 10 seconds.

Pediatric panoramic
The pediatric panoramic imaging program provides a reduced imaging area for pediatric and small patients.

TMJ
Lateral view from temporomandibular joint area with mouth closed or open.

BW
The bitewing view is a quick and easy alternative for intraoral bitewing imaging.

Instrumentarium Dental develops, manufactures and markets high-tech systems and solutions for dental and maxillofacial imaging. We work in close co-operation with dental professionals, universities and other research centers in our quest to develop solutions that will meet and exceed the expectations of our customers. As the establisher of panoramic X-ray imaging, we are committed to providing high clinical performance while still maintaining simplicity, ease of use and workflow efficiency. The Instrumentarium Dental product portfolio consists of a full range of premium quality imaging solutions for intraoral, extraoral and 3D imaging. For more detailed information about our products, please visit www.instrumentariumdental.com.

Instrumentarium Dental reserves the right to make changes to specifications and features shown herein, or to discontinue the product described at any time without notice or obligation. Contact your Instrumentarium Dental representative for the most current information. CE marked according to Medical Device Directive (NB 0537). Electrical safety according to IEC 60601-1. Operations comply with ISO 13485:2003, ISO 9001:2008, and ISO 14001:2004.
